

TAG Special Consideration Form

This form should be filled out with your subject teacher.

Please use this form to make us aware of any circumstances that you feel should be taken into account when weighing the evidence used to arrive at your TAG. These circumstances should be beyond the general impact of COVID-19, which has already been taken into account by the TAG process, and should include short-term illness or other personal circumstances that may have impacted performance in a specific assessment.

This information will then be used to apply one of the following mitigations:

- Impacted assessment replaced with a similar assessment from a different date (targeting the same topic/assessment outcomes)
- Impacted assessment given less consideration compared to other assessment when arriving at the TAG
- Impacted assessment omitted from your basket of evidence

It is important to note that teachers are required to have sufficient evidence of the content covered in order to arrive at a judgement. Therefore, the removal of an evidence source will only be as a last resort when the other two options have been exhausted.

We are not permitted to apply the following mitigations:

- Increase the grade or mark awarded in a particular assessment
- Be more lenient in applying the holistic grading methodology outlined by the exam boards and Ofqual

Where long-term illness or disability is a factor, mitigation will have already been put in place through access arrangements in line with JCQ guidance.

I confirm I have read and understood the above:
